

TUSHAR SHARMA

Software Engineer | Java • React • Flutter

tushars500@gmail.com | +91-6307699662 | [linkedin.com/in/tusharsharma](https://www.linkedin.com/in/tusharsharma) | github.com/tusharsharma

SUMMARY

Software Engineer with 4+ years shipping production Flutter apps in fintech and Web3. Trained in backend development (DSA, LLD in Java, DBMS, HLD, Spring Boot) with hands-on Java design projects and React frontend experience; targeting Java/Spring Boot + React full-stack roles.

SKILLS

Languages: Java, JavaScript, SQL, Dart

Backend: Spring Boot, REST APIs, Node.js, MySQL, MongoDB, Firebase, AWS (Lambda, SES, API Gateway)

Frontend: React, Tailwind CSS, HTML/CSS, Flutter

Core CS: Data Structures & Algorithms, OOP, Design Patterns, Low-Level Design (LLD), High-Level Design (HLD), DBMS

Tools: Git, GitHub Actions, CI/CD, Fastlane, Postman, Figma

EXPERIENCE

Mai Labs — Flutter Developer

Noida, India | May 2024 – Present

- Sole developer of a self-custodial crypto wallet: owned end-to-end architecture, service layers, secure key management, token/NFT flows, DApp transaction signing, and cross-chain bridge integration.
- Authored a pure-Dart blockchain SDK (wallet generation, certificate-based network governance, read/write gateway) adopted across 3+ internal products.
- Built token-marketplace trading flows against REST APIs with optimistic UI and commit polling; designed caching and pagination strategy that cut API calls by 60% and chart load times by 45%.
- Led a content-to-earn app processing 100k+ interactions: background task queues, OAuth/webhook verification pipelines, ERC-721 tokenization, and bank payout redemption flows.

Jombay — Software Engineer

Pune, India | Sept 2021 – May 2023

- Developed an assessment and video-interview platform (10k+ downloads) with live proctoring (webcam capture, app-switch and device-change tracking) across Aptitude, Psychometric, and Case Study modules.
- Delivered multimedia record/playback with chunked S3 uploads and auto-submission triggers; owned release lifecycle with GitHub Actions and Fastlane CI/CD.

PROJECTS

Low-Level Design in Java

| [git](#)

- Machine-coded Parking Lot, Splitwise, and BookMyShow systems in Java using SOLID principles and design patterns (Strategy, Factory, Singleton, Observer), with schema and concurrency-aware class design.

AI Mock Exam — React, Firebase, Mistral AI (OpenRouter)

| [git](#) · [live](#)

- AI-powered exam simulation platform: dynamic question generation, auth, scoring, and result analytics.

Pokemon-Almanac — React, Tailwind CSS, Firebase

| [git](#) · [live](#)

- API-driven Pokédex explorer with search, detail views, and AI-generated descriptions.

Service Booking App (Full Stack) — Express.js, React, Flutter

| [git](#) · [api](#) · [web](#) · [app](#)

- Urban Company-style booking platform: REST API backend, React web client, and mobile app.

EDUCATION & TRAINING

Scaler Academy — Backend Development Program

- Coursework: DSA, Low-Level Design in Java, DBMS & SQL, High-Level Design, Spring Boot.

B.Tech, Computer Science & Engineering (First Division, Hons) — AKTU, Lucknow

2017 – 2021

AWARDS & ACHIEVEMENTS

Jombay Hackathon Winner • GATE 2021 Qualified • 2× Hacktoberfest • Silver Medal (DSA & DBMS) • Topper, Programming in C
