SKILLS

Backend: NodeJS, NextJS, Firebase, AWS, REST APIs, MongoDB
Frontend: Flutter (5+ published apps), React, Tailwind CSS, HTML, CSS, JS, React, Figma
Flutter: Clean Arch. (DDD), BLOC, Provider, Retrofit, DI, Local DB, Local Auth, JWT Auth, Hive, Camera
Core CS: Data Structures & Algorithms, LeetCode, Design Patterns, LLD, HLD
Misc: Git, Firebase, Fastlane, GitHub Actions, UI/UX, Generative AI

EXPERIENCE

Mai Labs

Flutter Developer

Noida, India

May 2024 - Present

- **Crypto Wallet App:** Sole developer responsible for end-to-end design, testing, and deployment of a secure, cross-platform self-custodial crypto wallet. Built wallet generation, token/NFT management, DApp transaction signing, cross-chain bridge, and analytics integration.
- **Blockchain SDK (Dart):** Authored a pure-Dart SDK powering wallet generation, network governance (certificate-based registration), and a Gateway for read/write blockchain flows.
- **Meme Coin Marketplace App:** Collaborated on a Polygon token trading app; delivered live price & historical analytics, buy/sell transaction flows with optimistic UI and commit polling, API-driven token minting pipeline and market discovery features (featured/trending/ATH/graduated). Optimized caching and pagination to reduce API calls by 60% and cut chart load times by 45%.
- **Social Tasks & Reward App:** Acting lead for a content-to-earn app: implemented view tracking and background task queues (100k+ interactions), OAuth/webhook social-task verification, points, tokenization of ERC-721 and bank payout redemption flows.
- **Digital Wallet App:** Contributed to the development of a digital wallet system enabling INR-backed wallet transactions and vendor settlements. Supported integration of gift card purchase and redemption for major brands and helped migrate all building canteens to our digital wallet payment model.

Jombay

Software Engineer

Pune, India

Sept 2021 - May 2023

- **Assessments App:** Developed an assessment app (iOS/Android; 10k+ downloads) — a scalable assessment and video interview platform featuring Aptitude, Psychometric, and Case Study modules with live proctoring (webcam capture, app-switch, and device-change tracking) - state management with Provider. Delivered multimedia response flow with record/playback, chunked S3 uploads, and auto-submission triggers; managed build, signing, and distribution using Flutter-Fire CLI, GitHub Actions, and Fastlane.

PROJECTS

Rumour - Anonymous Chat App Flutter, Firestore, Firebase Auth, BLoC

Moviez App Flutter, TMDB API, BLoC, Retrofit

Blogz App (Fullstack) Flutter, Auth, Supabase, DBMS, BLoC

Pokemon-Almanac React, Open-Router, Firebase, Tailwind

AI Mock Exam React, OpenRouter, Firebase, Mistral AI

Contact Me Page (Fullstack) AWS Lambda, AWS SES, API Gateway, CloudWatch

Who's this Pokemon? HTML, CSS, JS, Fun

AWARDS

Winner (Jombay Hackathon), 2 Times Hactoberfest Qualified, Silver Medal (DSA & DBMS), Topper (Programming in C), GATE 2021 Qualified

EDUCATION

Dr. A.P.J. Abdul Kalam Technical University, Lucknow

Lucknow

B.Tech (Computer Science and Engineering) | (I Div - Hons)

Aug 2017 - Sep 2021
